

# MINI-B

THE MINIATURE-BOTTLE  
MADE OF 100% ALUMINIUM

METAL  
  
recycles  
forever

## DESCRIPTION

First of all, our Mini-B attracts everyone's attention with its high-quality aluminium look and attractive print image!

At the latest when holding and using the bottle, everyone is convinced by the pleasant and extraordinary haptics:

Our Mini-B is something very special!

In comparison to conventional glass bottles, our aluminium bottles are also shatterproof and much lighter, because the Mini-B only weighs one tenth of an equivalent glass bottle. For this reason, one truck with our Miniature-Bottles corresponds (with the same amount of bottles ) to three full trucks with glass bottles, which leads to significantly lower CO2 emissions in the entire transport chain of the aluminium bottles.

In addition, the Mini-B ideally protects the content from light and prevents the loss of aroma.

In a production campaign, your miniature bottle can be printed inline according to your wishes starting at a lot size of 25,000 pieces.

## TECHNICAL FEATURES

- 20 ml / Ø 27,7 mm x 62,7 mm
- Thread suitable for PP18 or ROPP18 closures
- Food compliant

## YOUR ADVANTAGES

- 100% Made in Germany
- Lightweight
- Shatterproof
- Inline directly printable (from MOQ 25,000 pieces per artwork)
- Perfect barrier properties: light impermeable & aroma-proof
- Safe use at events: No misuse of the bottle as a projectile
- Sustainable because of less transport effort
- Unlimited recyclability
