

# ALUMINIUM TUBE WITH CHILD-RESISTANT STOPPER

## DESCRIPTION

Our latest LINHARDT complete system, consisting of an aluminium tube and a tamper-evident CR stopper, contributes in multiple ways to your product's safety: The certified child-resistant, senior-friendly stopper protects against incorrect usage. The aluminium tube is light, stable, shatterproof and has excellent barrier properties. All these benefits ensure that your filling material is optimally protected from external influences.

All components are provided from one source – Contact us for more information!
